

Riva Selegg

Egg graders

**TECHNOLOGY AND QUALITY
PRECISION AND EFFICIENCY**

Riva Selegg egg graders are manufactured using very sophisticated materials and technologies. Accurate and detail planing has allowed the engineering and the manufacture of highly reliable and updated equipment, from the technological point of the view. Furthermore, these egg graders are very easy to operate and require very simple scarce maintenance.

WEIGHING SCALES

These are the “heart” of the egg graders. This is the reason why they have been studied and manufactured with the utmost care and precision. For special requirements the regulation of the counterweight enables to set any weight category.

BELT CONVEYOR

This is an innovative solution wich carries out the dilicate operation of moving the eggs from the exit of the scales to the handpacking table.

MODULATION

The engineering and the manufacture of the modules for the egg graders allow for very easy maintenance besides offering the possibility of feeding the eggs either on the left or on the right side in order to be able to fit them into any type of place according to the individual needs.

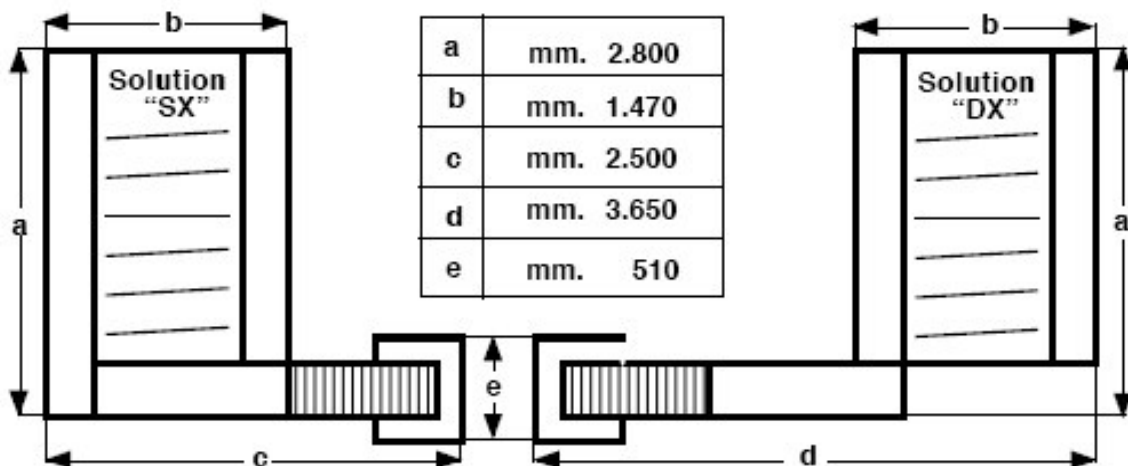

CANDLING

All the Riva Selegg egg graders are standard equipped with candling system with fluorescent lamps.

EGG STAMPING DEVICES: Are available, on request.

EGG COUNTER: Available, on request.

VACUUM LOADERS: Are available, on request.
